## PROJECTS

- **Digital Vehicle Smart Mobile Application for Instant Search of License Insurance and RC Book:** I built this application for my college project with my in-charge sir help. Nowadays increasing public used vehicle via road but they are not followed any Rules and Regulation So this project is used to public vehicle details are stored to database.
- **IGONSOFT:** I worked the first project of my Internship from my office own website home page using HTML5, CSS3, Bootstrap, Javascript. I built website responsive and user-friendly website.
- **Digital Mantraaz:** I built all the pages of this website using HTML5, CSS3, Bootstrap, Javascript. I learned to make a responsive website from this project.
- **JK Physio & Rehab clinics:** Before this project I didn't know WordPress but now I know well because requirement so I learned WordPress and built this website. Website link is <https://jkphysioandrehabclinics.com/>
- **DMI- St. John the Baptist University:** I worked second project with WordPress so now I learned more then things from WordPress by this project. Website link is <https://www.dmisjbu.edu.mw/>
- **My Portfolio:** Finally built my own portfolio website using HTML5, CSS3, Bootstrap, Javascript, Node.js, Express.js, MongoDB with my own design. I have knowledge of back end and database but not very well. You can view my full details from my portfolio website and my website link is <https://fernandas.onrender.com/>
